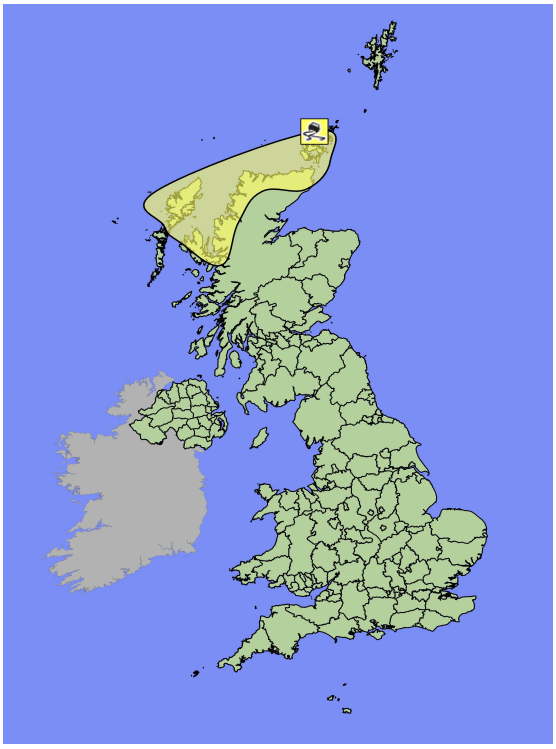
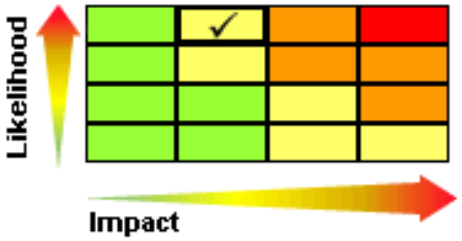
National Severe Weather Warning Service





Chief Forecasters Assessment
A weak front pushing north across the north of Scotland is producing rain which is falling onto frozen surfaces giving some treacherous driving conditions especially on untreated routes.

This is an update to a previously issued warning - the warning period has been extended into Friday morning, and accounts for the fact that ice is likely to persist after the rain and sleet have died out.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Thu, 13th Dec 2012** until **11:00 on Fri, 14th Dec 2012**

Rain and sleet across the northwest is falling onto already frozen surfaces, with ice forming readily.

The public are advised to take extra care and to be aware of the risk of ice on roads and pavements.
